We recommend, in addition to our instructions for maintenance, to consider carefully the demands of EN 1176-7

## 0-42252-000 K&K Double cable ride (50,00 m)

### One-time maintenance

Check all screw connections; if necessary screw down again. Cover screw-head with protecting cap.

one-time only  
approx. 4-5 weeks after installation

### Recommendations about regular maintenance

Check cleanliness of play- and safety area, take out alien elements

Check stability of vertical posts, tighten bolt-connections if necessary

Check other component elements for wear and tight connections, tighten connections and replace defective elements if necessary

Check chain suspensions for wear, replace if necessary

**Please note that grub screw inside chain adapter has to be tightened e.g. with Allen wrench or catch stoutly without overwinding the hexagon socket**

Check bearings and/or joints for tight fixing and easy-running function

Check rubber parts like seats, hoses, collars etc. for wear, replace if necessary

Check tension and wear of cables, tighten if necessary

Check pulley and trolleys for easy-running function and check wear of consumable elements especially the impact plates (see picture), replace if necessary.

Check foundation, foundation anchoring and whole construction for corrosion, repair or replace if necessary.
