

1. Assign location of equipment considering the space requirement.
 2. Excavate soil for foundations, according to drawing.
 3. Put posts into holes of foundations (mounting depth = playlevel is marked by strip).
 4. **Attention! For installation of the pre-assembled components the screws have to be lubricated with installation paste! Tighten all screws after having aligned all components.**
 5. Grout in foundations with compressed concrete PG75, chamfer the edges and cover with sand (according to EN 1176 - 1).
 6. Release for play after concrete foundations have set.
 7. Check all screw connections after one month, and if necessary screw down again.
- Tools: socket spanner 13 and 24, allen-key 14
