Product description:

Roplay VARIO M + Access Net, icosahedron space framework, Height 3,2 m (10'-6") with a single Bucky-Ball net structure.

All anchor points are equipped with a central single-point tensioning system warranting that no fastening element or rope eyelet is accessible to users. The 25 steel members Ø 48,3 x 1466 mm (Ø 1 7/8" x 4'-10") in the framework are corrosion resistant and powder-coated environmentally sound.

The 11 aluminum-cast nodes in the framework are also coated in the zinc-powder-process.

The spatial netting is made of polyester-coated steel cables (U-Rope®) with a diameter of 16 mm (5/8"). Contrary to cable coatings out of polypropylene the polyester is more abrasion-resistant and color fast to UV-light. The steel wires are drawn galvanized.

As cross connectors in the spatial netting aluminium-cloverleaf rings are being used that have been proven in 20 years of employment.
